Phạm Đại Nghĩa

Fullstack Developer

📞 0824144695 ✉ nghiaphamtq17@gmail.com 🔗 https://www.facebook.com/nghiapham17 📍 Cầu Giấy - Hà Nội

OBJECTIVE

My objective is to contribute my technical expertise and passion for creating engaging user experiences to an innovative tech company. I am motivated to learn and grow in a collaborative environment and seek challenging projects that expand my skill set. I have 2 years of experience in front-end development using ReactJS, 1 year of experience in NextJS, proficiency in related technologies such as Redux, GraphQL, and HTML/CSS/JavaScript, and proficiency in Figma for UI/UX design. Additionally, I am skilled in back-end development using NodeJS (ExpressJS), MongoDB, Restful API, and Strapi.

EDUCATION

FPT Polytechnic   2019 - 2022

Web Development

WORK EXPERIENCE

Smart OSC   2021 - 2023

Software Engineer

Worked as a frontend developer in the software development team
Developed and maintained e-commerce systems
Collaborated with other developers to deliver high-quality code and solutions

KB Fina   2023 - 2025

Software Engineer

Worked as a frontend developer in the software development team
Developed and maintained e-commerce systems
Collaborated with other developers to deliver high-quality code and solutions

Nexus Frontier Tech   2025 - Now

Fullstack Engineer

As a Fullstack Web Developer, I design, develop, and maintain web applications using .NET for the backend and Angular for the frontend. My responsibilities include implementing APIs, handling database integration, ensuring application performance, and delivering responsive, user-friendly interfaces. I collaborate with team members across different functions to analyze requirements, propose solutions, and ensure high-quality software delivery.

ACHIEVEMENTS

Successfully developed a car e-commerce system as a part of a 10-member team using ReactJS, NextJS, GraphQL, and Contentful.

Contributed to the development of an e-commerce ecosystem for a client in Thailand using ReactJS and GraphQL. Planned and developed new features and refactored code.

SKILLS

Front-end	ReactJS (3 years), NextJS (3 year), React Context, WordPress, GraphQL, Redux, HTML5, CSS3,

	JavaScript, Jquery, Storybook, Axios, Moment, Lodash, React Bootstrap, Material-UI, Ant design , React router dom,...
Back-end	NodeJS, NestJS, Restfull API, Strapi, .Net, ...
Database	Mysql, Mongodb, Postgresql
UI/UX	Figma

PROJECTS

CARMA 8/2021 - 05/2022

Front-end Developer

Build interfaces and connect content with Contentful.

Build filters with more than a dozen fields to query data with backend to get data.

MOTEL MANAGER 05/2022 - 08/2022

Full-stack Developer

Build a logic flow to manage motel rooms and manage building costs.

Build the backend and frontend code base using ReactJs, ExpressJs and MySql.

Build interfaces to manage buildings, rooms and manage internal devices.

CENTRAL 05/2022 - 01/2023

Front-end Developer

Improved product interface and user information management interfaces.

Participate in the upgrade process from version 1 to version 2 with better performance and website experience.

POWER BUY 01/2022 - 04/2023

Front-end developer

Improved product interface and user information management interfaces.

KB Fina webadmin 2023 - Current

Front-end Developer

Manage customer e-wallet information, transaction information, and customer activities.

Manage event streams and application tasks

KB ILSANG 2023 - 2024

Front-end Developer

Same as KBFina Web Admin but version for Indonesia.

The application is used for e-wallet management and many other wallet operations.

I built the app from scratch and improved the management sections to be easier to find and understand

Build new features suitable for the Indonesian market.

Recoin -

Fullstack Developer

Create a project to introduce a company specializing in selling electrical products.

Product management, article management

PLEVIA CITY 2025 - 2025

Fullstack Developer

Optimize your website's SEO by adding title tags, meta, content, images,...

Convert pages from Client Side Rendering to Server Side Rendering and Incremental Static Regeneration

TOPSS TOYOTA (Private Project) -

Fullstack Developer

I worked on developing a web-based management system for warehouses, storage yards, taxation, and distribution channels. The system helps distributors and brands streamline inventory tracking, warehouse operations, tax management, and overall supply chain efficiency. The project was built with **.NET** for backend services and **Angular** for the frontend, providing secure APIs, real-time data processing, and user-friendly dashboards for effective business management.
